PLAYNE CARDS

## CARD LAYOUTS

There are a number of effective Playing card Spreads, ranging from a single card to a 21-card reading. Frequently layouts use a multiple of 3 (typically 3, 9, 12, or 21) to explore a querent's past, present, or future. Playing cards can provide a quick snapshot or in-depth inquiry into one's life, depending on the number of cards used.

These Playing card readings are based on the suit and value of a shown card. The suit conveys the broader message of the card. Number cards usually signify events occurring in the near future. I have compiled a list of what each playing card in a standard deck of 52 cards signifies in a playing card reading.

Face cards represent people in your life. Each suit contains three face cards: the valet (knave or jack), the dame (lady or queen), and the roi (king).
